

What is CBD oil?

CBD is the 3-letter abbreviation for Cannabidiol oil. Cannabidiol is one of the dozens of natural compounds found in the hemp plant.

What's the difference between Hemp Oil and CBD Oil?

Full-spectrum hemp oil contains all of the compounds contained in the hemp plant. CBD oil contains only the Cannabidiol compound. It is important to note that the full array of hemp compounds offer a variety of vitamins, minerals and other phytonutrients that work together synergistically, making full-spectrum hemp the best choice for optimum good health.

How do I know if CBD oil is best for me?

The best way to determine if you will benefit from CBD or hemp oil is to try SYNC. Use it twice daily as recommended for 30 days and then assess how you feel. Of course, if you currently take any prescription medications, we recommend that you check with your health care provider before taking SYNC or any other dietary supplement.

Will SYNC make me fail a drug test?

No. According to our manufacturer, SYNC contains absolutely zero THC.

How does CBD oil interact with other medications?

That is a subject that is best addressed by your health care provider.

What type of testing is done on SYNC?

Two tests are submitted to a third party state approved testing facility for each flavor. The name of the testing facility is RM3. These are a THC and CBD potency test and are done on every batch received by Trevo. Results are posted on our website.

What is SYNC?

SYNC is a full-spectrum agricultural hemp oil product that is highly bio-available due to its proprietary water-soluble technology. It is available in either natural vanilla flavor or natural orange.

Can this be taken with Trévo or other supplements?

SYNC interacts well with Trévo so, yes, it can be taken in conjunction with Trévo. There are no indications that there are any limitations or concerns regarding taking full-spectrum hemp oil with other dietary supplements. However, if you have any concerns, we recommend that you speak with your health care provider.

Is this a natural product?

Yes, SYNC is 100% natural. The hemp is grown using organic practices, the flavorings are natural and even the preservative (vitamin E) is natural.

Is SYNC legal to take?

Yes it is.

What happens if I get pulled over with SYNC?

SYNC is a completely legal product in all but five states, and it will not be sold in those five states until they pass legislation legalizing the sale of Cannabidiol or hemp oil containing Cannabidiol. So, the answer is that absolutely nothing will happen if you are pulled over with SYNC.

Is there any THC in SYNC?

SYNC is available for retail sale through Trévo’s Life and Health Coaches as well as on Trévo’s website (trevocorporate.com)

What is the benefit of taking a CBD oil daily vs taking as needed?

In order to obtain the best results, it is necessary to get a sufficient amount of Cannabidiol oil or full-spectrum hemp oil on board in your system. Simply taking it when you feel it would help may give you some benefits, but not nearly as much as taking it as recommended (twice daily).

What is the difference between Hemp oil and CBD Oil?

Full-spectrum hemp oil contains all of the compounds contained in the hemp plant. CBD oil contains only the Cannabidiol compound. It is important to note that the full array of hemp compounds offer a variety of vitamins, minerals and other phytonutrients that work together synergistically, making full-spectrum hemp the best choice for optimum good health.

Can you explain the difference between CBD marijuana oil, Hemp oil and Hemp seed oil?

Basically, cannabis is an umbrella term that includes both hemp and marijuana plants. Cannabis sativa is the scientific name of the cannabis plant (Cannabis = genus; sativa = species), and hemp and marijuana are just two different strains of it. (One could correctly refer to a “marijuana” or “hemp” plant as a “cannabis” plant, for example, but you would not refer to a “marijuana” plant as a “hemp” plant, or vice-versa).

Hemp seed oil is extracted from the seeds of the hemp plant typically using a cold-press process. This type of oil can actually be extracted from all plants in the cannabis genus, but only industrial hemp is used in production. Industrial hemp is used primarily because they have been specifically bred for seed and stalk. Hemp seed oil can be used as a substitute for olive oil and other cooking oils in various recipes and in salad dressings.

Can SYNC interact with other pharmaceutical drugs?

That is a subject that is best addressed by your health care provider.

Is there any side effects with taking SYNC?

There are absolutely no known side effects.

Will SYNC make me tired or give me lots of energy?

It will neither make you feel tired nor give you lots of energy. It contains no stimulants that cause jitters or excessive energy, but does contain a number of very beneficial vitamins, minerals and phytonutrients that promote overall good health.

What is the difference between a Full Spectrum Hemp Oil Vs A CBD isolate?

The extraction process determines whether the active Cannabidiol compound is removed from the plant as an “isolate” or as a “full-spectrum” oil.

A CBD isolate is exactly what it sounds like; pure, isolated CBD compound, all by itself. It exists as a white-ish powder, and contains no other active compounds – nothing.

Full-spectrum hemp oil, on the other hand, contains other active compounds in addition to Cannabidiol.

Is SYNC a Full Spectrum or Isolate?

SYNC is a full-spectrum hemp oil product.

How is the Oil extracted from SYNC?

Utilizing an Organic Ethanol Wash.

What does it mean SYNC is 100% Bioavailable?

Bioavailable speaks to the ease of absorption into the bloodstream. Since SYNC is truly a water-soluble product, it offers up to 100% absorption. This absorption rate varies from person to person, dependent upon their own body.

What is the benefit of SYNC being Water Soluble?

True water-solubility means a quicker uptake into the bloodstream as well as a much higher rate of absorption.

Does SYNC provide Third Party lab results?

Yes – see answer in previous question above about testing. You can visit our website at any time and see these results with the batch number from the bottom of your bottle.

Will I get high from taking SYNC?

No. SYNC does not contain THC.

How is our oil is extracted?

Utilizing an Organic Ethanol Wash.
